About App:

The darb application is a platform that aims to build a communication channel between the parents of school kids and their respective schools. By developing a mobile application that can easily be accessed by parents, an isolated and professional environment is created where all school communications can be held at. The darb application will provide multiple mechanisms such as chatboxes, announcement boards, and notifications. All to assist in the communication channel between the parents and the school. Darb also seeks to aid parents with the complexity of school enrollment procedures, where it will help guide and facilitate parents through the whole process effectively. This all comes in an effort to elevate the quality and authenticity of parent-school relays, exchanges, and transactions.
